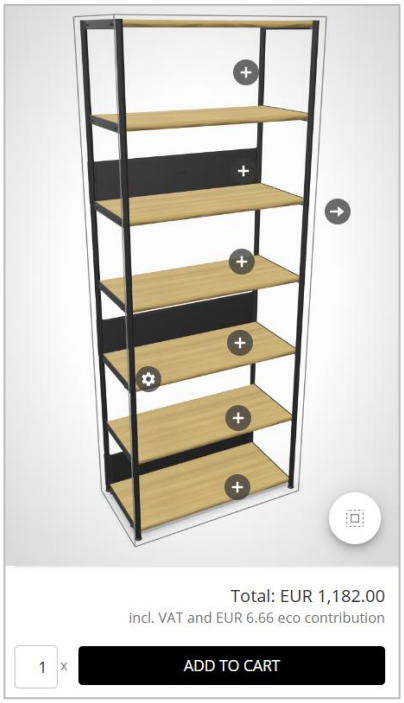
1 New Features

1.1 Price and shopping cart button in full screen mode on mobile devices

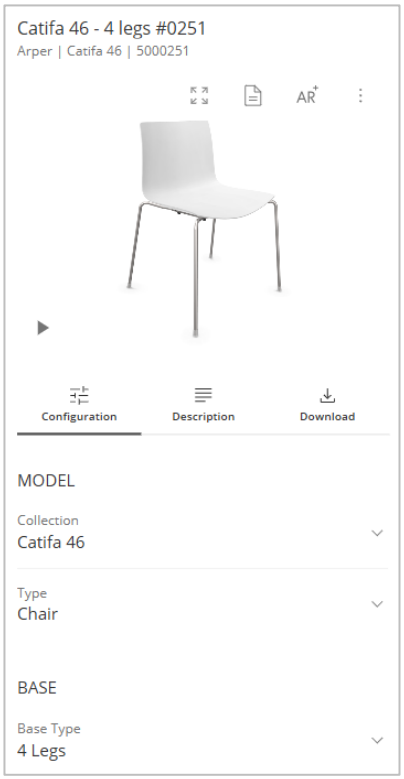


In full screen mode on mobile devices, the 3D view now includes an information area with price, VAT, eco tax and discount as well as an Add-to-Cart button. Customers can configure the product entirely via the OAP interactors in the 3D view and add it directly to the shopping cart without leaving full screen mode.

To decide flexibly whether this footer is displayed in mobile full screen mode, the URL parameter `sff=true` must be set.

Please note that this feature is only useful for articles that can be configured via OAP. For all other articles, no configurable properties are available in full screen mode.

1.2 Optimization of the mobile layout



The mobile layout has been revised for both portrait and landscape format. The user interface makes better use of the available screen space and is easier to operate on smartphones and tablets.

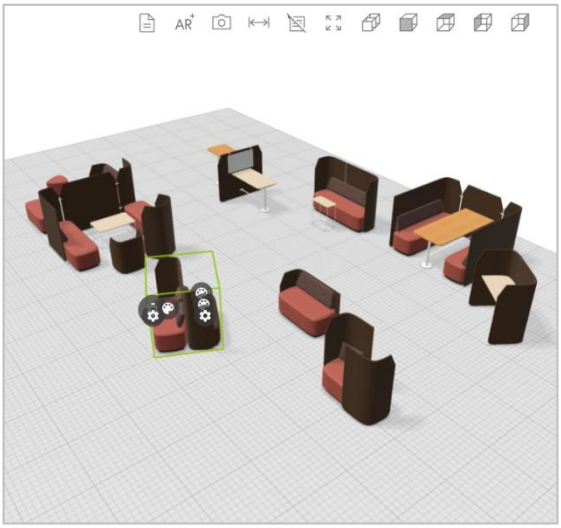
1.3 Support for region-specific number formatting

The URL parameter for the language has been extended so that a locale can be specified as well, e.g. `lang=de-CH` or `lang=fr-CH`. Numerical values are then formatted according to the conventions of the respective region. In addition, `lang=auto` is supported. In this case, the first compatible locale from the visitor's browser settings is used.

Examples:

```
Germany (lang=de-DE):      1.234,56
USA (lang=en-US):          1,234.56
Switzerland (lang=de-CH):  1'234.56
```

1.4 Displaying a floor in 3D view



The article can now be displayed placed on a floor in the 3D view. This provides better spatial orientation and a better understanding of size and scale. Color, size and grid of the floor can be customized in the global pCon.ui settings.

1.5 PropertyListEditor: Definition Export to Gatekeeper

The export of the PropertyListEditor is now stored in the Gatekeeper database. pCon.ui retrieves and processes the matching data record automatically, so it is no longer necessary to host a ZIP file on a separate server.

Please note that this feature will only be available once the PropertyListEditor version corresponding to pCon.ui 2.21 has been released. This release will follow at a later date and will be communicated separately.

2 Bugfixes / Changes / Miscellaneous

- New option in the global settings to permanently display all scroll bars
- Control of the maximum height of the article image in the PDF report as a global setting
