History EGR-TS

EGR-TS 3.8.1 (2022-03-24)

- Compatible with pCon.configurator 5.9.1 and pCon.planner 8.7
- EGR-TS should work with software rendering again (no 2D view in single test)

EGR-TS 3.8 (2021-12-14)

- EGR-TS 3.8 compatible with pCon.planner/pCon.configurator 5.9 and pCon.planner 8.6
- Major refactoring

EGR-TS 3.7 (32 bit and 64 bit versions)

- EGR-TS 3.7 32 bit is compatible with pCon.planner/pCon.configurator 5.8.13 Update 1
- EGR-TS 3.7 64 bit is compatible with pCon.planner 8.4
- Fixed a bug caused by a memory leak
- Improved testing speed performance

EGR-TS 3.6 (32 bit and 64 bit versions)

- EGR-TS 3.6 32 bit is compatible with pCon.planner/pCon.configurator 5.8.10
- EGR-TS 3.6 64 bit is compatible with pCon.planner 8.1
- Improved Licensing support

EGR-TS 3.5 Patch 2 (32 bit and 64 bit versions)

- Fixed a crash which appear for some series when switch to Single test mode.

EGR-TS 3.5 Patch 1 (32 bit and 64 bit versions)

- Fixed a problem generated by Windows April 2018 Update.

EGR-TS 3.5 (32 bit and 64 bit versions)

- EGR-TS 3.5 32 bit is compatible with pCon.planner/pCon.configurator 5.8.9
- EGR-TS 3.5 64 bit is compatible with pCon.planner 7.7
- Added support for SafeNet Licensing

EGR-TS 3.4 (32 bit and 64 bit versions)

- Added support for both 32 bit and 64 bit pCon applications
- EGR-TS 3.4 32 bit works only with 32 bit pCon applications
- EGR-TS 3.4 64 bit works only with 64 bit pCon applications
- Implemented option to change application language
- Extension of test for multilingualism
- List with tested Articles in Catalog Mode will contain only Standard Catalog Items (S)
- Projects will be language independent (project with texts saved in EN will appear correct if language is changed to DE)

- Memory optimization
- Detailed error output
- Error removal and code cleanup

Version 3.2

- Added support for pCon.planner 6/7 (32 bit)
- Summary.xls file is correct exported
- Fixed a wrong library initialization if a new project is created or an already existing project is opened
- Type Series Catalog is also available in the list
- Detailed error logging
- Added option to enable EAI Debug Messages
- There are no more double entries in the log
- Corrected some translations
- pCpn.planner Pro 64bit can't be used as base application.
- Base directory is not allowed to be changed during EGR-TS session.

Version 3.0

Native OCD, 2D - Mode

Implementation of NativeOCD Support and 2D-Mode

Check of validation dates of price components

check of price components against user defined date

Memory Optimization, automated application restart

Automated cache deactivation. User defined restart of the application during test run.

KPS Ambiente - Support

KPS Ambiente can be used as base application.

Support of pCon.creator - Dongle

Beside Matrix Dongles the EGR-TS 3.0 supports pCon.creator Dongles as well.

Extension of Test-Log File

Revised, enhanced output in test-log file.

Version 2.3

Revision of help

Help was adapted according to application changes

Mixed 2D/3D Mode in Single test

Optional representation of object in 2D/3D Mode

Show object size in Singel test

Optional representation of object size

View selectable in single test

Definition of different views during single test with help of function keys (F2 to F6)

Filtering of defined errors

Optional filtering of errors according to settings

Summary of test results in one Log-File

Optional Summary of all Log-Files in a CSV or XLS-File

Configuration test

New test, which checks articles with defined configurations

Free selectable Log-directory

Free selectable, user defined directory for Log-Files

Usability of major table

Conversion to new table component makes handling easier

Delphi - Upgrade

Compatibility to Delphi 2006

Bug fixing

Fixing of application errors
