# 1 Calculation

## 1.1 Show Subtotal for planning groups

With the autumn release we are able to display the subtotals for planning groups directly in the article list and article calculation. An info icon shows that the subtotal is calculated based on the values of all sub items.

Item ID	Description	Price	Quantity	Total Price	Series
1	Kado Office Vitra   Kado Office	11,019.05	1	11,019.05	Kado Office
1.1	Modul Vitra   Kado Office	4,068.82	1	4,068.82	
1.1.1	K25 5HU E6.4/E-I-0-I-I-F 72503230   Vitra   Kado Office	937.82	1	937.82	
1.1.2	K25 Plant box W400 x D400 x H250 72445200   Vitra   Kado Office	657.98	1	657.98	
1.1.3	K25 Plant box W400 x D400 x H250 72445200   Vitra   Kado Office	657.98	1	657.98	
1.1.4	K25 tube axis 800, one-sided PC30 72529730   Vitra   Kado Office	36.13	1	36.13	
1.1.5	K25 tube axis 800, one-sided PC30 72529730   Vitra   Kado Office	36.13	1	36.13	
1.1.6	K25 5HU M21.4/I-K-I-K-I-J 72507230   Vitra   Kado Office	1,147.90	1	1,147.90

Image 1: Subtotal for planning groups

In the detailed and summarized view of the report, the subtotal is now also included as textual information in the description of the (main) article.

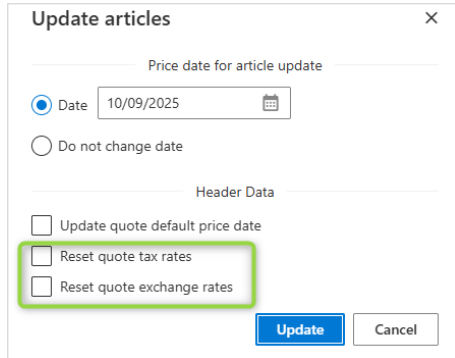

Description	Quantity	SP in EUR (excl. VAT)	TP in EUR (excl. VAT)
 <p><b>1</b> <b>Kado Office</b> <b>Vitra   Kado Office</b></p> <p>Kado Office</p> <p>Total depth: 1.025 m Total width: 2.4 m Total amount of modules: 4</p> <p><b>Sub Total: EUR 11,019.05</b></p>	<b>1</b>		
<p><b>1.1</b> <b>Modul</b> <b>Vitra   Kado Office</b></p> <p>Modul</p> <p><b>Sub Total: EUR 4,068.82</b></p>	<b>1</b>		

Image 2: Subtotal for planning groups in detailed and summarized report view

**Note:** This behavior applies to all article compositions in which the main or parent article is marked as a pseudo article.

## 2 Workflow

### 2.1 Reset taxes and exchange rates during the article update

We have enhanced the Update articles dialog. It now allows for you to update all (selected) articles and commercial values of the project with one click.

In a single operation it updates not only the article data, it also synchronizes the latest taxes and exchange rates provided by our cloud. In addition, we refactored the possible options for the update of the article price date to simplify the handling.

Image 3: Redesigned Dialog: Update articles

### 3 Article Management

#### 3.1 AI-based translation of article texts

In version 2.15, we are starting to use AI in pCon.basket Online by supporting AI-powered translation of the custom article texts directly in the workflow. If the article data does not support the chosen quote language, you can copy the (original) article text and start the AI translation per text field (short, long and variant text).

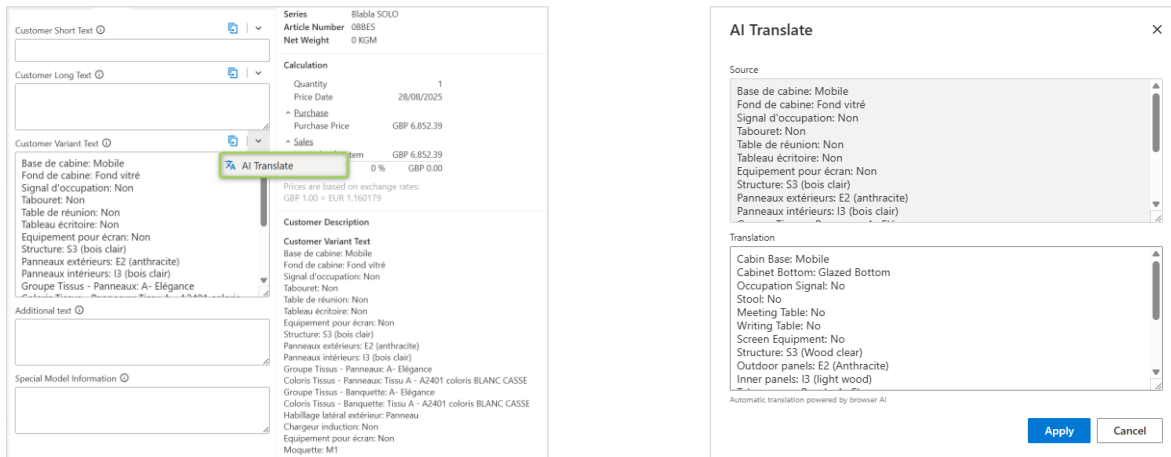

Image 4: AI Translate Custom Article Text

The translated text will be shown in an additional text field where you can apply the AI suggestion or fine tune the translation manually.

**Note:** This Feature is available only in Google Chrome.

In this video, we'll show you step by step how to automatically translate texts into your customer's language, how to confirm the translation, and how to create complete, linguistically consistent offers in no time. Perfect for international projects or multilingual customer communication!

## 4 Report

### 4.1 Attach PDFs to the generated Report

Starting with version 2.15, you can now easily attach PDF files from a local source to your quote. The feature is based on enabling a local root folder, which must be defined via *Settings > Report*.

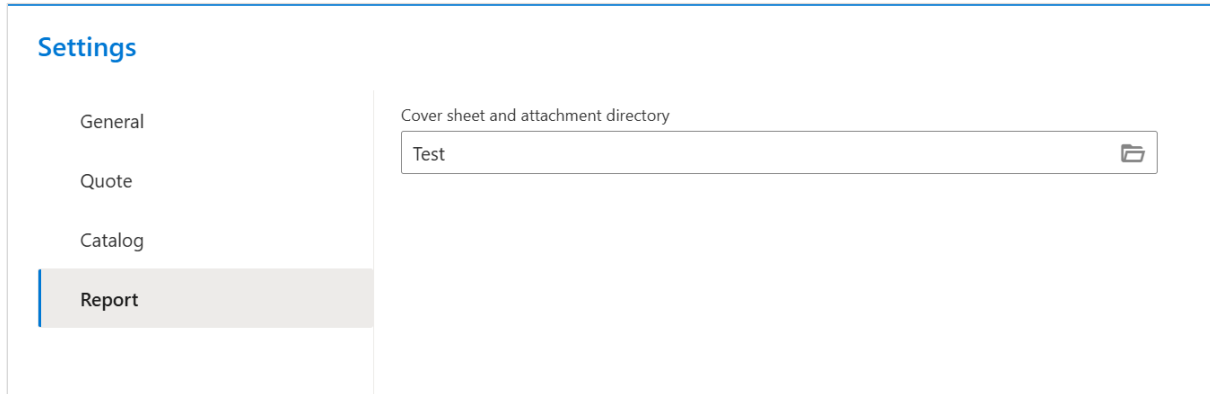

Image 5: Settings for local folder for PDF sources

Once the folder is configured, any number of PDF files can be added during report generation, either as a cover page or an attachment. The PDF's will be attached according to the order in which they were selected.

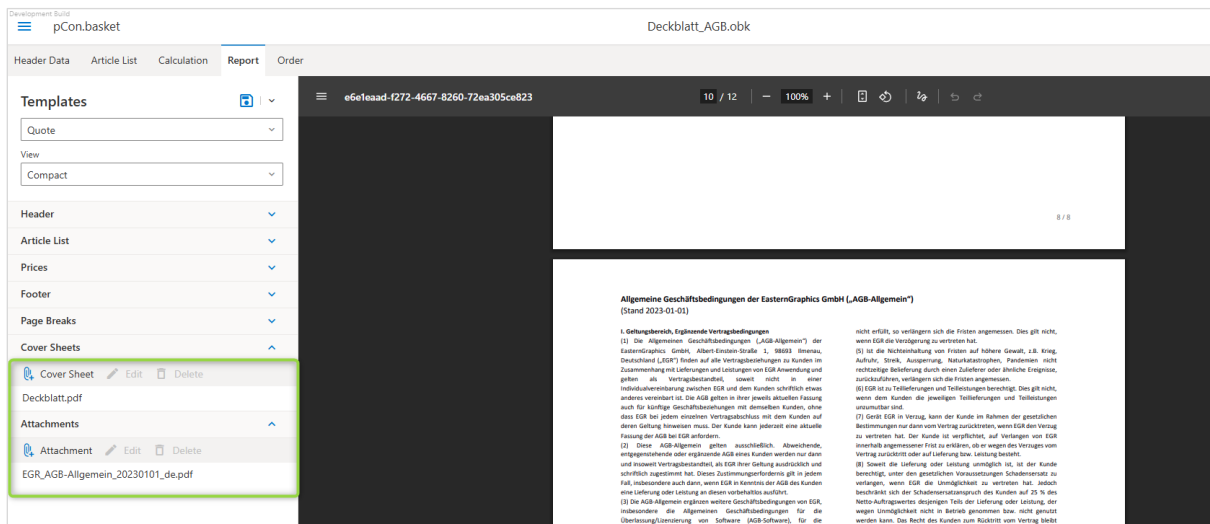

Image 6: Report options for cover sheet and attachments

The result is a single, consolidated document that combines the standard pCon.basket report with the custom attachments. Additionally, the reference to the attached PDFs is stored within the OBK file, ensuring that you don't have to reattach them each time you reopen the project.

#### Edition: Pro / Integration

**Note:** This feature is only available in Chromium based browsers like, for example, Google Chrome or Microsoft Edge.

## 4.2 Predefined Report-Settings

Predefined report settings will help you to switch easily to specific report configurations. With the upcoming release, you can create and save predefined report settings and reuse it with a single click.

These include:

- *The template itself*
- *View*
- *Report options (e.g. Header, Article List, Price...)*
- *Cover sheets and attachments*

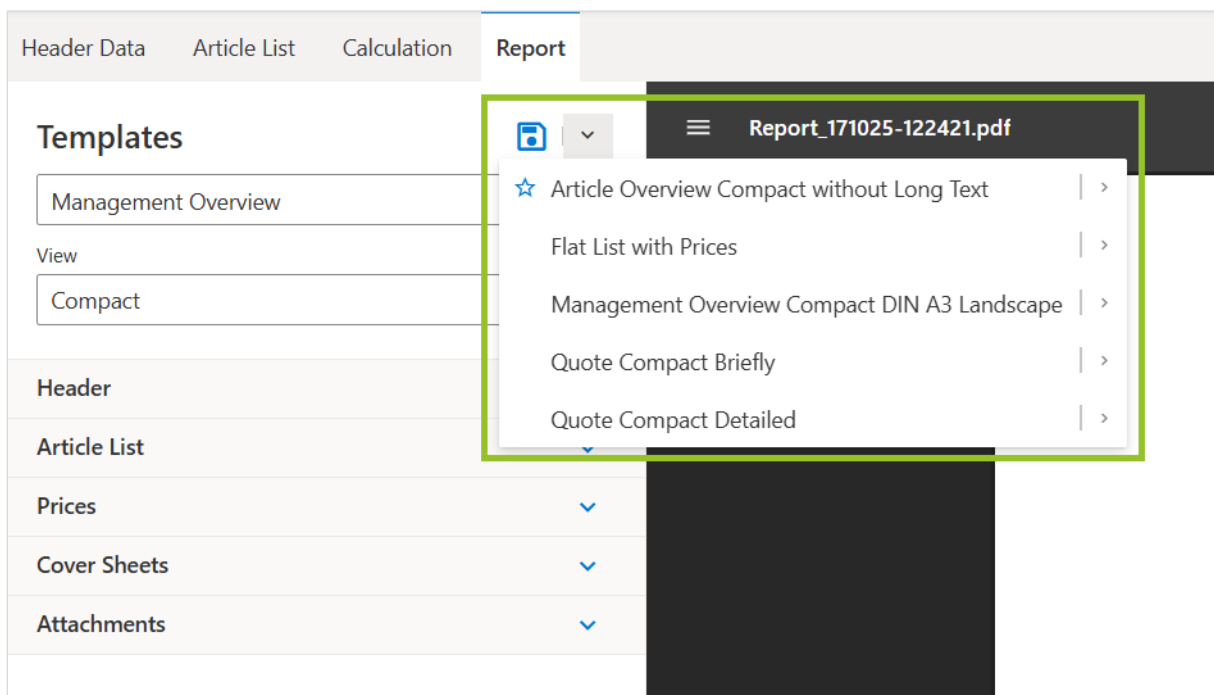

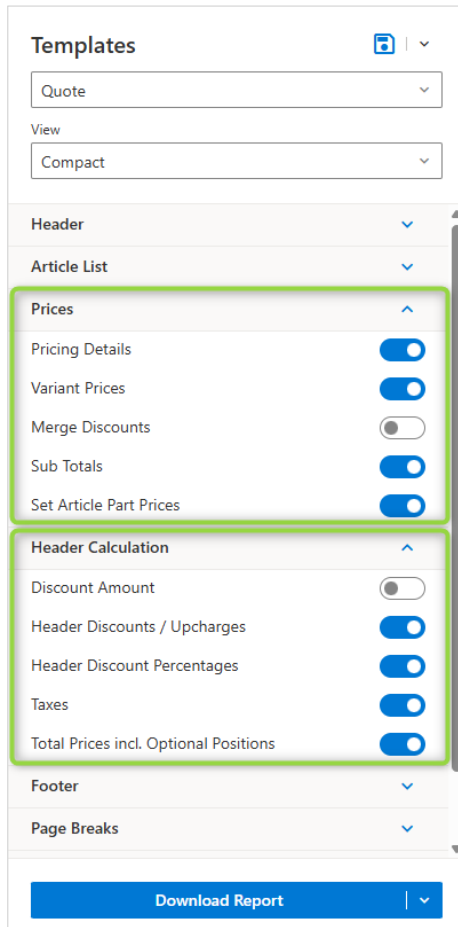

Image 7: List of predefined report settings

### 4.3 Reorganization of report option categories

To improve clarity and simplify the handling of the report options, a new category “Header Calculation”, extracted from “Prices”, is now available.

Image 8: new category "Header Calculation"

## 5 Excel-Export

### 5.1 Unique Column Header for Calculation Lines

To ensure that calculation rows can be clearly identified in the Excel and CSV exports, the column headers have been extended with the row number and counter. In order to correctly map the row number and counter, the structure of the calculation scheme is provided on an additional worksheet "Calculation Scheme" (for Excel) or in an additional file (for CSV).

### 5.2 New Column for Management Overview

The Excel export *management overview* has been extended by an additional column "Article Number."

## 6 Changelog

### 6.1 pCon.basket for Integration

#### 6.1.1 New features

- added new message `wbkHost.logEntry` which can be used to capture log entries
- added new option `errorReportEmailAddress` to `wbk.configuration` message
- added report setting `filterUserTemplates` to `WbkConfiguration` to allow filtering of user(OWDS) templates
- added new user restriction `item.folder.additionalText` and `item.textItem.additionalText`
- added new user restriction `item.folder.fullWidthImage` and `item.setArticle.fullWidthImage`
- added new user restriction `item.setArticle.collapse`
- added new user restriction `report.attachments`
- added TypeScript declarations for user restrictions

### 6.2 WCF

#### 6.2.1 New features

- [eaiws] added support for EAIWS 4.18
- [utils] added `abortController` option to `async/FetchOptions`
- [utils] added `Log.onInfo` callback

## 6.3 EAIWS

### 6.3.1 Set Manufacturer and Series Name for User-defined and Set Articles

Till now it was only possible to set a manufacturer or series ID for user-defined articles or set articles which led to a different visualization on for example quotes for those articles. With EAIWS 4.18 it is now possible to use operation *setItemProperties* of basket web service to set the manufacturer name and/or series name of user article items and set-article items. For more details especially on restrictions see operation *setItemProperties* in EAIWS specification.

### 6.3.2 Further Changes

- Provide PropTitle (added optional field *propertyTitle* to complex type *ArticleData*)
- WSDL now shows the protocol as defined by *X-forwarded-proto header*. Therefore *wsdl\_fix* plugin is not required anymore.
- Startup property *egr.eai.basket.arttext* is now recovered after Session Suspend

### 6.3.3 OFML Support

For more details about OFML support in pCon applications please see [https://docs.pcon-solutions.com/ofml-specs/application notes/AN-2023-01\\_OFML Support in pCon Applications.pdf](https://docs.pcon-solutions.com/ofml-specs/application%20notes/AN-2023-01_OFML_Support_in_pCon_Applications.pdf)
