1 Workflow

1.1 Apply pCon.basket Defaults for Projects Transferred from pCon.planner

Projects that are transferred from pCon.planner to pCon.basket online now automatically apply your relevant pCon.basket default settings.

The header data of the new project is therefore consistent with the defaults you have configured, and you can continue working right away instead of adjusting default values manually after every transfer.

In addition, an article update is now suggested after articles have been transferred from pCon.planner.

Edition: Pro / CE / Integration

1.2 Enhanced Article Update Report

The update report that is created after an article update has been reduced to its relevant content. Instead of listing the complete article list, the report now only contains articles that were actually updated, migrated or whose price has changed.

In addition, this a summary of the articles with updated price is given.

Update-Report

08/09/2026

Summary

Article	Old Price	New Price	Change
1.1 Aston Club - Vierstrahlig niedrige Rückenlehne #2402	EUR 3,199.00	EUR 3,264.00	2.00 %
1.2 Swivel chair with upholstered backrest	EUR 847.00	EUR 896.00	5.80 %
1.5 Soft Work	EUR 9,512.41	EUR 9,547.05	0.36 %
1.6 Venta H Bench 160x168	EUR 1,013.25	EUR 2,876.46	183.88 %
1.7 Connex O-Desk 160x080 Comfort System	EUR 606.43	EUR 648.98	7.02 %
1.12 Herit Armchair Upholstery	EUR 587.50	EUR 587.50	
1.14 Era Lounge Chair Low	EUR 1,933.33	EUR 2,029.17	4.96 %
Total	EUR 17,698.92	EUR 19,849.16	12.15 %

Edition: Pro / CE / Integration

1.3 New Catalog Layout

The catalog has been redesigned. Catalog images are now displayed with the larger resolution, so products are presented in the best possible way and articles are much easier to recognize.

In addition, you can now decide yourself how the catalog layout should be:

- the *compact* layout makes it easier to browse large catalogs quickly
- the *large* layout makes products easier to assess and to present

The catalog layout can therefore be set up to your personal way of working, and different screen sizes and working environments are accommodated much more effectively.

Edition: Pro / CE / Integration

1.4 Favorite Catalogs for Preferred Suppliers

Catalogs can now be marked as favorites. Favorite catalogs are listed first, so recommended or strategic suppliers can be selected considerably more efficiently.

A catalog is added to or removed from the favorites by activating or deactivating the heart icon.

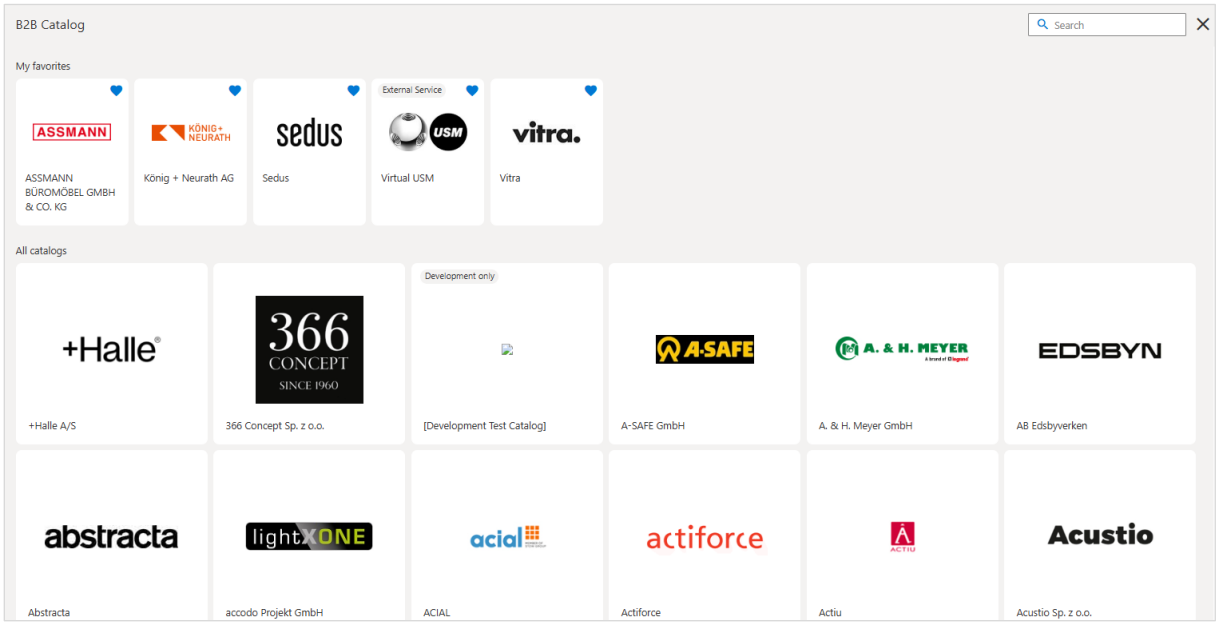

Image 5: catalog marked as favorite

Edition: Pro / CE / Integration

1.5 Office 365: Pagination on Folder-Level

For drives containing more than 201 folders and/or files, pagination and lazy loading are supported.
This enhancement providing immediate feedback instead of waiting for the entire drive content to be loaded.
Additional content is loaded progressively as needed.

Edition: Pro / CE

2 Calculation

2.1 Support for Further Eco Contribution Systems

In addition to the French eco contribution system Valdelia, pCon.basket online now supports the French systems *Ecosystem* and *Ecomaison*.

To add an Ecosystem or Ecomaison contribution manually, the matching code has to be entered. The eco fee is then calculated according to the calculation rule that is stored for this code.

3 Article Management

3.1 Formatted Article Texts

Article texts can now be formatted. Character formatting such as bold and italic as well as bullet points are available, so important information within an article description can be structured and highlighted. With activating a text field, the formatting options will be visible.

The formatting is retained in the generated report.

Edition: Pro / Integration

3.2 Use PIM Content via Hyperlink

With the enhancement of 3.1 PIM content can now be added to the article description text fields by drag and drop. A hyperlink to the corresponding PIM entry is created automatically.

Edition: Pro / Integration

4 Reporting

4.1 New Options for the Quote Template

The *Quote* report template offers further additional options for individualization:

- the creation date can be hidden
- a watermark can be added to the generated report
- the calculation summary can be hidden in total

The options are available in the report settings and can be stored in a report profile like all other report options.

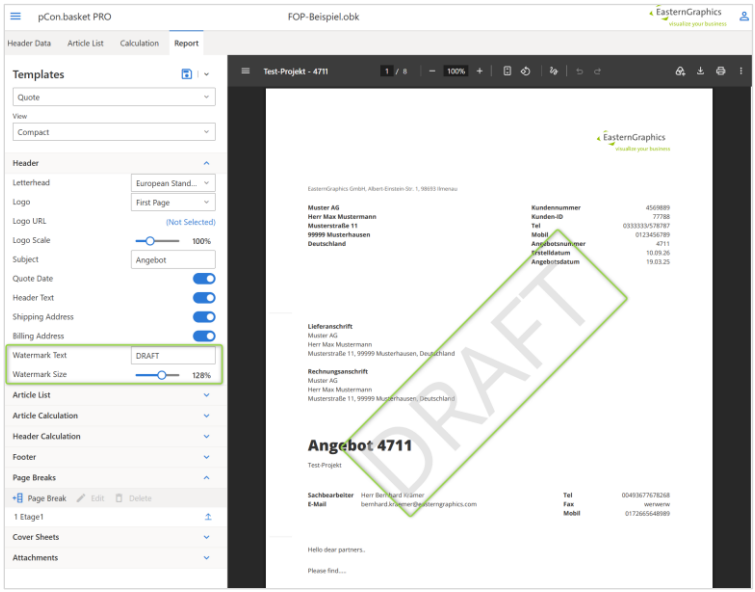

Image 9: report option to add a watermark

Edition: Pro / Integration

4.2 Visibility of Report Options

The report options now adapt to the settings you have already made. Options that cannot take effect anymore because another selected option rules them out, or because their state has no influence on the result at all are no longer shown.

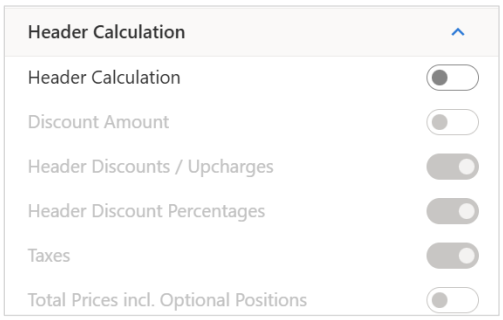

Image 10: Visibility of report options

Edition: Pro / CE / Integration

4.3 Robust Report Generation for Large Projects

Report generation has been made more robust for large projects. Timeouts and errors that could previously occur with very extensive article lists are avoided.

Edition: Pro / CE / Integration

5 Miscellaneous

5.1 Renamed Terms

To align the terminology with the other pCon applications, three terms have been renamed:

Previous term	New term
User Article	Custom Article
Set Article	Article Set
Special Model	Special Design

The change affects the user interface only - the behavior of the corresponding functions remains unchanged.

Edition: Pro / CE / Integration

5.2 OEX 3.1: Attach OBX Renamed to Embed OBX

In the OEX export dialog, the option *Attach OBX* has been renamed to *Embed OBX* for OEX 3.1. The new name describes the actual behavior more precisely: the OBX is embedded into the OEX file, it is not attached to it.
