## Release Information: pCon.creator 2.19

### Internationalization

---

Languages:	EN, DE
------------	--------

---

### State

---

Version:	2.19
----------	------

---

Package:	Complete Package
----------	------------------

---

Distribution:	by EasternGraphics and Partners
---------------	---------------------------------

---

### Interfaces

---

OCD:	4.3, 4.2, 4.1, 4.0, 2.1
------	-------------------------

---

XOCD:	4.3, 4.2, 4.1, 4.0, 2.1
-------	-------------------------

---

XCF:	2.10
------	------

---

DSR:	3.4
------	-----

---

Export:	OCD 2.1 / 4.0 / 4.1 / 4.2/4.3 XCF 2.10 OAM 1.0 ODB 1.0 / 1.1 (OFML 2.0) DSR 3.4 IPMF 1.0
---------	---

---

### Support

---

Mailing List:	support@EasternGraphics.com
---------------	-----------------------------

---

## Platform(s)

Operating System:	Microsoft Windows 10 Microsoft Windows 11
Office System: <sup>1, 2, 3, 4</sup>	Microsoft Office 2021 Professional (Access) 32bit Microsoft Office 2019 Professional (Access) 32bit Microsoft Office 2016 Professional (Access) 32bit Microsoft Office 2013 Professional SP1 (Access) 32bit (End of support from pCon.creator version 2.20)  The Microsoft Office Desktop versions – mentioned above – from the Microsoft Office 365 subscriptions are supported, too <sup>5</sup> .
CAD System: <sup>6,7</sup>	pCon.planner PRO 8.7 pCon.planner PRO 8.6 Autodesk® AutoCAD® 2023 64bit Autodesk® AutoCAD® 2022 64bit Autodesk® AutoCAD® 2021 64bit Autodesk® AutoCAD® 2020 64bit Autodesk® AutoCAD® 2019 64bit
Additional: <sup>8</sup>	Aladdin Hardlock (Safenet Sentinel HASP / EGR-SafeNetActivation) Microsoft XML Parser 6.0 (64bit Windows) Microsoft Visual C++ Runtime 2015 Microsoft .NET Framework 4.7.2

<sup>1</sup> Microsoft Office 64bit is not supported. The 32bit version should be used on 64bit operating systems.

<sup>2</sup> The Microsoft Access Runtime version is not supported.

<sup>3</sup> Using several functions of pCon.creator the installation of Microsoft Excel is required, too. Microsoft Excel and Access from the same Office Suite Version should be installed.

<sup>4</sup> Internal problems or conflicts of internal parts of office components can occur when installing different Microsoft Office components in parallel. A result of such Office internal problems may be that pCon.creator does not start. Especially installing Office from an Office 365 subscription already installed Office versions e.g. pre-installed test versions should be removed first.

<sup>5</sup> Using pCon.creator a locally installed Microsoft Office Access Desktop version is necessary. For this reasons Office 365 subscription plans which include only web or mobile Office Apps are not supported.

<sup>6</sup> The Autodesk® AutoCAD® LT Versions are not supported. Functionality of LT versions is limited. E.g. the restricted LT versions do not contain API interfaces for inter process communication and automation.

<sup>7</sup> 32bit Versions of the Autodesk® AutoCAD® software are not supported on 64bit operating systems.

<sup>8</sup> pCon.creator Setup automatically verifies and installs the additional required components if necessary.

## Minimum System Requirements<sup>9</sup>

Processor:	x86 or x86-64 Pentium IV (class 2 GHz) or equivalent AMD processor
System memory:	2 GB
Operating system:	Microsoft Windows 10
Available disc space:	1 GB
Graphics board:	For graphical data creation the graphic board requirements of the used CAD-System and pCon.planner should be taken into account.
Screen resolution:	1280 x 1024 pixels
Microsoft Office	Microsoft Office 2013 Professional SP1 (Access) 32bit
CAD-System	Autodesk® AutoCAD® 2018 or pCon.planner PRO 8.7
USB-Port	

## Further Remarks

**Attention:** Workspaces opened and upgraded with this version cannot be opened in pCon.creator versions which are older than pCon.creator 2.19. Please refer to sales history document regard details and expected warnings of the database upgrades.

Since introducing OLAYER name convention of layers and blocks in OFML data, the ODB-Module allows using the former naming convention FOS for backwards compatibility. Data projects which are still using the old FOS naming convention in ODB data should migrate to use OLAYERS. The FOS naming convention cannot be activated anymore on new product lines. After migrating existing data projects it cannot be reactivated anymore in pCon.creator user interface.

In pCon.creator ODB Module the compatibility mode to import geometric components from Autodesk® AutoCAD® software is not available anymore for new product lines. It remains active on existing product lines. But after deactivation it cannot be reactivated anymore in pCon.creator user interface.

In OAS module the old catalog entry type Scene (fml) or OFML Group (ogrp) are obsolete now. We recommend to adjust data projects preferring to use the Typical in pCon Exchange Container format instead of these old catalog entry types. Support of the old catalog entry types Scene (fml) and OFML Group (ogrp) is prospectively discontinued in future versions of pCon.creator.

<sup>9</sup> The system requirements represent an example of a minimal supported system environment. The supported versions of required components are described above. Please note, that these components may have got their own individual additional system requirements
