pCon.update DataClient 1.12 System Requirements

Minimum requirements	
Processor	x86-64 at 1 GHz or more
System Memory	2 GB or more
Operating System	Windows 10 version 1607 LTS or higher (64 bit) Windows Server 2016 or higher
Disc Space	200 MB[1]
Graphics Board	Any
Display Resolution	1024 x 768 pixels or more
Internet access	Minimally: 5 Mbit/s Recommended: 50 Mbit/s or more
Security software (firewall etc.)	Usually, DataClient and DataPool operate in conjunction with security software without any difficulty. In case of very restrictive security software, it must be ensured that access to *.easterngraphics.com and *.pcon-solutions.com (each port 80 and 443, respectively) is enabled and download and installation of any files from these servers is possible. If the automatic installation is used, this also applies to the user account used for this purpose (the SYSTEM account by default).
PDF Viewer	Recommended (For viewing update information)
pCon.login	pCon.login user account is needed Exception: use of local data source (like local file server)

[1] Additional disk space is needed for the programs and manufacturer catalogs that have to be installed. Temporary disk space for the installation files is also required.
